## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-5, 7 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Long et al. or Nakao.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 8, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Long et al. or Nakao in view of Thakur et al. Long et al. or Nakao discloses the claimed invention except for the cover comprises acrylic. Thakur et al. teaches that it is known to provide a sterile airflow device with acrylic material as set forth at column 2, lines 46-51. It would have been obvious to one having ordinary skill

in the art at the time the invention was made to make the device of Long et al. or Nakao of acrylic, as taught by Thakur et al. in order to take advantage of the chemical resistance thereof.

5. Claims 6, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Long et al. or Nakao in view of Knab. Long et al. or Nakao discloses the claimed invention except for bottom having two layers. Knab teaches that it is known to provide a clean room with a bottom having two layers as set forth at column 3, lines 7-58. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bottom of Long et al. or Nakao with two layers, as taught by Knab in order to contamination from reverse flow.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
